DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on *** has been entered.

Response to Arguments

2. Applicant's arguments, regarding the newly recited claim language, filed 2/18/10, with respect to claims 1,16 and 17 have been fully considered and are persuasive. The rejection of claims 1,16 and 17

3. Claims 2-15 has been withdrawn because they were drawn to non-elected species.

4. The examiner is doing an examiner's amendment to cancel the withdrawn claims 2-15.

EXAMINER'S AMENDMENT

5. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

6. Claims 2-15: CANCEL

Allowable Subject Matter

7. Claims 1,16 and 17 are allowed.

8. The following is an examiner's statement of reasons for allowance: Regarding claim 1 prior art Huemann et al. (US 5,661,811) discloses an onboard audio system comprising: a plurality of audio devices (AM/FM tuner 10, tape player 12, CD player14, Figure 1; column 2, lines 43-46); a front seat speaker and a rear seat speaker for outputting reproduced audio from said audio devices (front speakers 20, column 2, lines 48-50 and rear speakers 36, column 3, lines 34-36; column 4, lines 49-52; Figure 1); a headphone for rear seat passengers for independently outputting a reproduced audio from one of said audio devices arbitrarily selected by the rear seat passengers through a rear seat control (headphones 38, column 3, lines 35-37; Figure 1).

Huemann teaches of a front controller 30; an operating device mounted in a front seat area in a neighborhood of a driver for performing a predetermined operation by the driver (front controller 30 is operable by the driver or front passenger, Figure 1; column 2, lines 56-60); a control device for outputting a first control signal based on what sort of operation is performed by said operating device (microprocessor 32 is programmed to carry out the commands of the front and rear controls, Figure 1; column 3, lines 4- 20; the microprocessor 32 carries out its control functions based on compatibility with the commands from the front control, column 2, lines column 1, line 66-column 2, line 6; column 2, lines 60-67;column 5, lines 12-15); and a first signal attenuator for attenuator for attenuating an input signal to said headphone in response to a control signal from the operating means (if commands from the rear control are compatible with commands

Art Unit: 2614

from the front control then the microprocessor proceeds to send out command functions including activate a speaker/headphone switch 54 for selectively connecting the headphones; volume control 56 is provided for the headphones, volume control implicitly can attenuate or increase the input signal to the headphone; column 3, lines 5- 40). The volume control will be able to attenuate or increase the signal once the switch 54 is selected to connect the headphone to the audio source; therefore volume control 56 attenuates in response to a control signal from the front control (operation device). Prior art Nicholson et al. (US 6,330,337) discloses a vehicle that has a plurality of audio/visual devices (Figure 1; radio , column 1, lines 30-32, remotely mounted audio media player, DVD player, video game unit ,column 2, lines 40-44; reads on plurality of audio/visual devices). Prior art Wietzke (US 6,567,655) discloses a car radio system.

Regarding claim 1, the prior art or combination thereof fails to disclose or make obvious a headphone for rear-seat passengers outputting a reproduced audio separately from a reproduced audio output from the rear seat speaker, from another one of said plurality of audio visual devices arbitrarily selected by the rear-seat passengers through a rear-seat control;wherein the input signal provided from one of the audio visual device to the headphone is different from the input signal provided from the other audio visual device to the rear-seat speaker.

Claims 16 and 17 are allowed due to dependency on claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
